

Retrieval, source prominence, and citation accuracy by engine

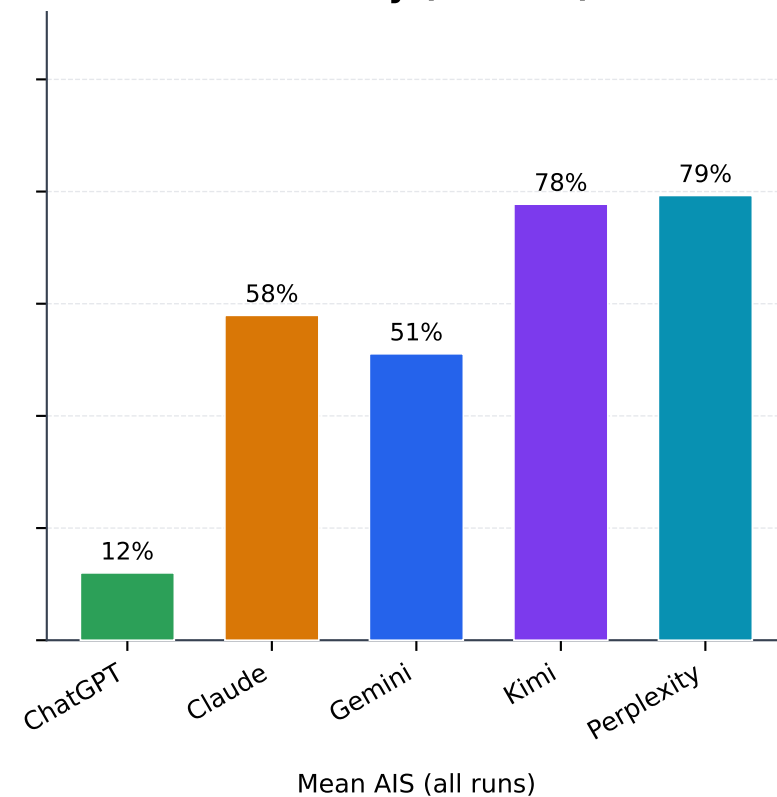

Retrieval rate by engine

Prominence when retrieving

Accuracy (all runs)

ChatGPT Claude Gemini Kimi Perplexity

Perplexity and Kimi retrieve on nearly every query (100%, 99%) and lead on accuracy (79%, 78%), while ChatGPT's low retrieval rate (33%) pulls its all-runs accuracy down to 12% despite competitive prominence when it does retrieve (42%).
